Name L-12 Air, Water and Weather Subject - Science I. Tick the correct option: 1. Trick the correct option: 1. The rate of evaporation depends on:	Nama		Bal Bharati PUBLIC SCHOOL Ludhiana	Worksheet No. 34
I. Tick the correct option: 1. The rate of evaporation depends on: a) temperature b) surface area c) air d) all of these 2. Pellets or small balls of ice found in very cold region: a) dew b) snow c) frost d) hailstones 3. Which of the following chemical is NOT used to purify water: a) Chlorine b) baking powder c) bleaching powder d) potassium permangana 4. Hot air is than cold air a) heavier b) lighter c) colder d) none of these 5. The level of underground water in an area is called a) deep water b) water table c) Underground table d) deep water table II. Fill in the blanks: a) The change in weather is caused by the b The candle flame always burn c) Water that seeps in the ground is called d Chlorine tablets are used to kill present in the water. e) is the state of atmosphere at a particular place and time. III. Give one word answer: a) The amount of water vapours present in the air b) Change of water into water vapours upon heating c) Pouring out clear liquid without disturbing the sediments d) Settling of heavy insoluble impurities in water e) Clear liquid received upon filtration IV. Match the following: a) Land breeze Germs b) Sea breeze C) Moving air Day time		L-12 A	ir, water and weather	
1. The rate of evaporation depends on: a) temperature b) surface area c) air d) all of these 2. Pellets or small balls of ice found in very cold region: a) dew b) snow c) frost d) hailstones 3. Which of the following chemical is NOT used to purify water: a) Chlorine b) baking powder c) bleaching powder d) potassium permangana 4. Hot air is				Subject - Science
a) temperature b) surface area c) air d) all of these 2. Pellets or small balls of ice found in very cold region: a) dew b) snow c) frost d) hailstones 3. Which of the following chemical is NOT used to purify water: a) Chlorine b) baking powder c) bleaching powder d) potassium permangana 4. Hot air is				
2. Pellets or small balls of ice found in very cold region: a) dew b) snow c) frost d) hailstones 3. Which of the following chemical is NOT used to purify water: a) Chlorine b) baking powder c) bleaching powder d) potassium permangana 4. Hot air is			N -2-	D - H - Cd
a) dew b) snow c) frost d) hailstones 3. Which of the following chemical is NOT used to purify water: a) Chlorine b) baking powder c) bleaching powder 4. Hot air is				d) all of these
3. Which of the following chemical is NOT used to purify water: a) Chlorine b) baking powder c) bleaching powder d) potassium permangana 4. Hot air is				d) hailstones
a) Chlorine b) baking powder c) bleaching powder d) potassium permangana 4. Hot air is than cold air a) heavier b) lighter c) colder d) none of these 5. The level of underground water in an area is called a) deep water b) water table c) Underground table d) deep water table II. Fill in the blanks: a) The change in weather is caused by the b b) The candle flame always burn c) Water that seeps in the ground is called d c) Water that seeps in the ground is called e) present in the water. e) is the state of atmosphere at a particular place and time. III. Give one word answer: a) The amount of water vapours present in the air b) Change of water into water vapours upon heating e) Pouring out clear liquid without disturbing the sediments d) Settling of heavy insoluble impurities in water e) Clear liquid received upon filtration IV. Match the following: a) Land breeze Germs				u) nanstones
4. Hot air is				d) potassium permanganat
5. The level of underground water in an area is called				, ,
a) deep water b) water table c) Underground table d) deep water table II. Fill in the blanks: a) The change in weather is caused by the	a) heavier	b) lighter	c) colder	d) none of these
a) The change in weather is caused by the	The level of under	ground water in an are	ea is called	
a) The change in weather is caused by the	 a) deep water 	b) water table	c) Underground table	d) deep water table
a) The change in weather is caused by the				
b) The candle flame always burn	II. Fill in the blanks:			
c) Water that seeps in the ground is called	All the form of the first of the second	and the second s	·	
d) Chlorine tablets are used to kill present in the water. e) is the state of atmosphere at a particular place and time. III. Give one word answer: a) The amount of water vapours present in the air b) Change of water into water vapours upon heating c) Pouring out clear liquid without disturbing the sediments d) Settling of heavy insoluble impurities in water e) Clear liquid received upon filtration IV. Match the following: a) Land breeze Germs b) Sea breeze Wind c) Moving air Day time			· · · · · · · · · · · · · · · · · · ·	
e) is the state of atmosphere at a particular place and time. III. Give one word answer: a) The amount of water vapours present in the air b) Change of water into water vapours upon heating c) Pouring out clear liquid without disturbing the sediments d) Settling of heavy insoluble impurities in water e) Clear liquid received upon filtration IV. Match the following: a) Land breeze Germs b) Sea breeze Wind c) Moving air Day time	(1)			
a) The amount of water vapours present in the air b) Change of water into water vapours upon heating c) Pouring out clear liquid without disturbing the sediments d) Settling of heavy insoluble impurities in water e) Clear liquid received upon filtration IV. Match the following: a) Land breeze Germs b) Sea breeze Wind c) Moving air Day time				
a) The amount of water vapours present in the air b) Change of water into water vapours upon heating c) Pouring out clear liquid without disturbing the sediments d) Settling of heavy insoluble impurities in water e) Clear liquid received upon filtration IV. Match the following: a) Land breeze Germs b) Sea breeze Wind c) Moving air Day time	e)	is the state of	atmosphere at a particular p	place and time.
IV. Match the following: a) Land breeze b) Sea breeze c) Moving air By time Germs Wind Day time	c) Pouring out clead) Settling of heav	r liquid without disturby insoluble impurities i	bing the sediments	
a) Land breeze b) Sea breeze c) Moving air Day time	e) Clear liquid reco	eived upon filtration	_	
b) Sea breeze c) Moving air Day time	IV. Match the followi	ng:	A.	··· /
c) Moving air Day time	a) Land breeze		Germs CF E	() W/m
130 6-5	b) Sea breeze		Wind Wis	33%.
d) Soluble impurities Night time	c) Moving air		Day time	3
	d) Soluble impurit	es	Night time	138 C
